

Hotspot Lending Pool Grant Application

The Homework Gap is widening. As more school assignments require the use of the Internet, a new inequality has emerged where some students do not have access to the internet at home. Mobile Beacon and Digital Wish recognize this inequity and are committed to helping close the Homework Gap. Together, we have donated over 4,000 mobile hotspots to schools, yet the demand keeps growing. Our new Hotspot Lending Grant provides up to 5 hotspots with one year of unlimited 4G LTE internet service for schools interested in starting a hotspot lending pool to aid students without internet access. To apply for this grant, complete the application form below and email it to Jennifer.miller@digitalwish.org by January 10th, 2019!

School Name: _____

Name and Title: _____

Address: _____

City: _____ State: _____ Zip: _____

Phone: _____ Email: _____

Grant Award Requirements and Conditions:

- Create a Hotspot Lending Pool Program for students and teachers using the donated devices. Digital Wish will provide technical support to help you set up the program.
- Share progress and challenges about the lending program with Mobile Beacon and Digital Wish after 6 months and one year from the start of the grant so we may continue to help other schools in need.

Describe your need for assistance in setting up a Hotspot Lending Pool below:
